

Thank you for participating in this hackathon. We will be building a simple version of Twitter, a personal status social network.

Following are minimal system requirements:

1. Authentication System *(Laravel auth is okay to use)*
2. User Profile
 - a. Basic Personal Information (Name, location)
 - b. Status Messages

Bonus features:

1. Follow / Unfollow profile
2. Display number of followers in each profile
3. View Layouts
4. Bootstrap
5. JavaScript / AJAX to post status without reloading page
